

DESIGN: NUMEN / FOR USE

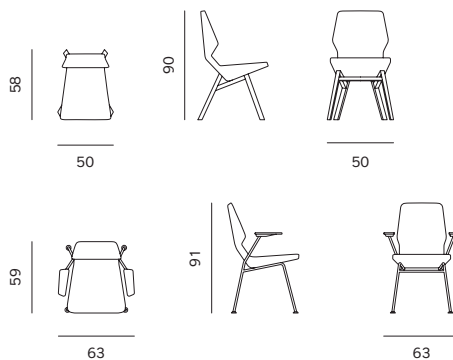

The basis of the system is the characteristic profile of a chair which, defined by two triangular prisms, ensures maximum foam thickness on the rear of the seat and the backseat's lumbar area. The metal is bent at a specified geometry and is upholstered with the moulded foam, resultis in a unified pulsating form. As a result of the triangulation, the solid oak legs thin towards the bottom, thus transforming the square cross-section of the top of the legs into their bases' triangle.
